Profile

Diploma in Engineering (Computer Science) student and Full Stack Web Developer dedicated to building seamless and scalable digital products. Experienced in leveraging a full suite of modern web technologies to deliver complete solutions. Passionate about coding and committed to continuous professional growth.

Professional Experience

MAK TECH Solution, Mac Tech Solution	08/2025 – Present
• Full-Stack Architecture: Architected and maintained scalable web applications using the MERN stack (MongoDB, PostgreSQL, Express.js, React, Node.js) and Next.js, ensuring high performance and SEO optimization. • API Development: Designed and implemented robust RESTful APIs following the Layered Architecture (Route-Controller-Service) pattern to ensure clean, maintainable, and testable codebases. • Database Management: Leveraged Prisma ORM and PostgreSQL to design efficient relational schemas, optimize complex queries, and manage data integrity for production-grade applications. • State Management & Logic: Integrated Redux Toolkit for efficient global state management, reducing prop-drilling and improving application predictability across large-scale projects. • Deployment & DevOps: Managed end-to-end deployment workflows using Vercel, Render, and Coolify, while utilizing Git/GitHub for advanced version control and collaborative code reviews. • Client Solutions: Successfully delivered multiple live projects for international clients via Fiverr, translating complex business requirements into functional technical specifications and high-quality software.	8th Floor, A Majid Tower, Ka-21 Progati Sarani Rd, Dhaka 1229

Education

Diploma In Engineering(C.S.T), Tangail Polytechnic Institute 	2021 – Present Tangail, Bangladesh
Secondary School Certificate, BMTF High School and College 	2021 shimultoli,Gaziput

Skills

Frontend Development:

- **Languages:** HTML5, CSS3, JavaScript (ES6+), TypeScript
- **Frameworks/Libraries:** React.js, Next.js
- **Styling:** Tailwind CSS

Tools & Platforms:

- **Version Control:** Git, GitHub
- **Development:** VS Code, Postman
- **Design:** Figma

Backend & Database:

- Express.js, MongoDB, Firebase
- JWT Authentication, REST API Design

Soft Skills & Professional Qualities:

- Team Collaboration
- Effective Communication
- Client Requirement Analysis
- Problem-Solving

Projects

School Management System | Full-Stack Web Application ☑

- Developed a full-stack platform using React 18, TypeScript & Tailwind CSS.
- Features include Attendance Tracking, Student Management, and Teacher Management.
- Built a multi-user portal for Students, Teachers, and Parents with dedicated dashboards.
- **Architectural Pattern:** Engineered the system using a **Layered Architecture (Route-Controller-Service)** to ensure separation of concerns and long-term maintainability.
- **Multi-Role Chat System:** Engineered a real-time messaging infrastructure using **Socket.IO** ☑ to enable seamless communication among Admins, Teachers, and Students.

Advertising Platform | Full-Stack Web Application ☑

- **Advanced RBAC Implementation:** Engineered a robust **Role-Based Access Control (RBAC)** system to provide distinct, secure dashboards and permission sets for Admins, Advertisers, and End-users.
- **Dynamic Service Marketplace:** Developed a scalable feature allowing users to seamlessly create, manage, and showcase professional services and events with real-time data persistence.
- **Secure Financial Transactions:** Integrated **Stripe Payment Gateway** to handle secure, PCI-compliant transactions for service subscriptions and promotional listings.
- **Production-Grade Architecture:** Followed a modular **Layered Architecture (Route-Controller-Service)** to ensure clean separation of concerns, high maintainability, and code reusability.
- **High-Performance UI:** Built a "pixel-perfect" and fully responsive user interface, ensuring a seamless cross-device experience with optimized loading states and dark mode support.

Travel Agency Website | Full-Stack Web Application ☑

- **Premium Membership Access:** Implemented a secure registration system requiring a mandatory **Stripe payment gateway** integration for user onboarding.
- **Role-Based Content Protection:** Developed a strict authentication layer where travel deals, giveaways, and guides are exclusively accessible to paid, logged-in members.
- **Comprehensive Admin Dashboard:** Built a robust admin panel to manage and publish **Monthly Giveaways**, exclusive **Travel Deals**, and curated **Travel Guides**.
- **Secure Data Management:** Utilized **Prisma ORM** with **PostgreSQL** to handle complex relationships between users, payments, and premium content modules.

Backbencher Mart- Ecommerce ☑

- **Advanced Product Filtering:** Developed sophisticated search and category-based filtering to enhance user navigation and product discovery.
- **Role-Based Admin Dashboard:** Created a comprehensive admin panel for managing orders, updating stock levels, and analyzing sales data.
- **Optimized UI/UX Performance:** Ensured a pixel-perfect, fully responsive design using **Tailwind CSS** with fast loading states and mobile-first architecture.
- **Secure Authentication:** Integrated robust user authentication and protected routes for personalized profile and order history management.

Live Weather - Web Application ☑

- **Real-Time Weather Updates:** Provides current weather conditions for any city or location using live API data.
- **Search Functionality:** Users can quickly search for weather information by entering a city name.
- **Detailed Weather Info:** Shows temperature, humidity, wind speed, weather status (like sunny, cloudy, rainy), and more.
- **Responsive Design:** Works smoothly on desktops, tablets, and mobile devices.

Car Marketplace & Resale Platform | Frontend

- **Role-Based UI/UX:** Designed and developed a high-fidelity frontend with three distinct, fully-functional dashboard interfaces: **Admin, Agent, and User**
- **Modern Tech Stack:** Built using **React js(18)** and **Tailwind CSS (v4)**, focusing on a clean, "pixel-perfect" automotive marketplace aesthetic.

- **Interactive Browsing:** Created a seamless car discovery experience allowing users to browse, filter, and inspect used car listings with a focus on visual clarity.
- **Authentication Flow:** Implemented a **Demo Login System** to showcase the seamless transition and state-specific views for different user roles.
